

Project Brief

3500 South at Bangerter Highway Intersection Improvement

**2007 Legislative
Update**

Provided By:

**Commission
Approved
Project Budget:**
\$8,542,000

**Anticipated
Schedule:**
Construction –
February to Fall 2007

Project Description: Design & Construction, Continuous Flow Intersection

Bangerter Highway is a heavily traveled north-south corridor that crosses the west side of the Salt Lake Valley and meets 3500 South in the heart of a densely developed commercial district. 3500 South is also an important east-west thoroughfare for West Valley City and western Salt Lake County. The intersection currently experiences heavy bottlenecks during peak travel times. Due to traffic congestion and safety concerns in the area, UDOT selected this area to implement a new design called a Continuous Flow Intersection (CFI). The CFI is designed to increase “green light time” and remove the conflict between vehicles turning left and oncoming traffic, resulting in improved safety and traffic flow.

Anticipated Project Schedule:

- Design & Right-of-Way acquisition - Now through early 2007
- Construction - February 2007 through fall 2007

A Public Information Manager will be assigned to this project, to work with local businesses, residents and commuters during construction.
